

WOLFPACK MOTORSPORTS

FORMULA #29

Designed and built during the 2009-2010 school year, tenth Anniversary Car #29 competed in the spring 2010 FSAE race at Michigan International Speedway. The 445lb car is powered by an air restricted, fuel-injected, turbocharged 600cc Honda F4i engine. Out of 120 teams coming from all over the world, Car #29 came in 6th in the Acceleration Event, 10th in Fuel Economy, and 17th in Skid Pad.

Improvements made since the first year of Wolfpack Motorsports include:

- 0-60 in 3.17s
- 93hp, 74ft-lb torque
- Lateral G: 1.6
- 250lb lighter than original car
- Dry sump oil management system
- MoTec M400 standalone ECU
